PROJECTS

Clothing Store E-Commerce Platform: Sept 2024

- A fully responsive e-commerce platform was developed using React.js, offering 100+ dynamic product listings and seamless API integration.
- I created a shopping cart system with add/remove/update functionality to enrich the user experience by 30%. Incorporating user authentication (login/register) to personalise shopping for 500+ simulated users was done.
- The UI was designed with a mobile-first approach having 95% cross-device compatibility to make sure that the performance on all screen sizes is well maintained .
- I have built React Route with 10+ pages which can be navigated to make the site navigation more efficient by 40%.

URL Shortener: Oct 2023

- User Registration and Login: Secure authentication using JWT tokens and cookies, with protected routes that ensure only Authenticated users can shorten URLs.
- URL Shortening & Redirection: Allows users to shorten URLs and provides custom redirection.
- Analytics and Scalability: Offers an analytics dashboard for tracking clicks and insights, backed by a scalable and efficient backend for reliable performance
